ABOUT ME

Full-stack software engineer with 7 years of experience delivering scalable web and enterprise applications. Skilled across modern frontend and backend technologies, with experience leading development teams and managing the full software delivery lifecycle. Continuously expanding into AI-driven development, with additional freelance experience on international projects."

WORK EXPERIENCE

SOFTWARE ENGINEER – CEREBRUM – 01/2026 – Current – QATAR

- Develop and maintain scalable full-stack web applications using React and .NET, delivering secure, high-performance solutions for enterprise and government clients.
- Design and implement modern, accessible frontend interfaces using React and Fluent UI, alongside robust backend APIs, ensuring scalability, maintainability, and optimal user experience.
- Deliver digital solutions for Qatar Government entities and the Ministry of Labour (MOL), including project management platforms and AI-powered business systems, collaborating directly with clients and stakeholders to translate business needs into technical solutions.
- Lead and mentor a team of 2 junior developers, providing technical guidance, conducting code reviews, and promoting development best practices.
- Manage CI/CD pipelines and production deployments while participating in system architecture, solution design, and sprint planning throughout the development lifecycle.

FULL STACK DEVELOPER – KLEVR – 09/2023 – 01/2026 – BEIRUT, LEBANON

- Developed enterprise-grade full-stack web applications using React, Next.js, Node.js, and Strapi for banking, insurance, and business management platforms.
- Designed responsive, reusable user interfaces using Tailwind CSS, improving user experience across desktop and mobile devices.
- Built and integrated RESTful APIs, developing backend services with Node.js and NestJS.
- Customized and maintained Strapi CMS to enable flexible content management for multiple client projects.
- Optimized application performance and resolved production issues within a cross-functional Agile team, contributing to continuous improvements across multiple projects.

FRONTEND DEVELOPER – ECOMZ – 05/2022 – 08/2023 – BEIRUT, LEBANON

- Developed and maintained modern e-commerce applications using Angular, React, TypeScript, SCSS, and Bootstrap.
- Built reusable UI components and responsive interfaces to improve maintainability and user experience.
- Integrated frontend applications with RESTful APIs while collaborating closely with backend developers.
- Worked with product owners and UI/UX designers to transform business requirements into production-ready features.
- Improved application performance, responsiveness, and cross-browser compatibility while participating in Agile sprint planning, code reviews, and feature delivery.

FULL STACK DEVELOPER – ASTRATERRA – 04/2020 – 04/2022 – REMOTE - LONDON , UNITED KINGDOM

- Developed Intelligent Transportation System (ITS) and retail credit management solutions using Angular, .NET Core, Java, and SQL/Oracle databases.
- Designed and implemented backend APIs and business logic using .NET Core, and relational databases, ensuring data integrity and reliability.
- Built responsive, accessible frontend interfaces using Angular, Angular Material, HTML, and CSS, improving usability across enterprise and financial applications.

- Translated business requirements into polished, user-friendly features, collaborating closely with designers, backend developers, and QA engineers.
- Delivered high-quality, well-tested software within project timelines by working closely with cross-functional teams.
